Messe München

Munich, May 15, 2017
Press release**Diverse supporting program****CTT 2017 features conferences, seminars and round tables**

Seminars, conferences and round tables: This year the participants of CTT can look forward to a diverse program of supporting events. The 18th edition of the show will take place from May 30 to June 3, 2017, at the Crocus Expo IEC in Moscow.

The Ministry of Industry and Trade of the Russian Federation (MINPROMTORG RUSSIA) has worked on developing and introducing tools to stimulate the development of production in Russia effectively. The results of these measures and plans for improving the investment attractiveness of the industry as well as for stimulating new industries and renovating existing ones will be discussed during the conference "Current state and prospects for the development of production of road construction equipment in Russian Federation" on Tuesday, May 30.

At the round table "SRO reform: the first results, bottlenecks and consequences", the most problematic reform issues in the system of self-regulating construction organizations will be discussed. This event is organized by Business Russia, OPORA Rossii, the self-regulatory organization union "Inter-regional association of special construction organizations", NOSTROY and the industry magazine "Construction".

"Protection of interests of road construction consumers against the influence of the gray market" is organized by the Committee for Tractor, Agricultural, Logging, Communal, Road-Building Machinery of the Russian Engineering Union and the Council of the Federation of the Federal Assembly of the Russian Federation. An effective system for protecting consumers from the "gray market" needs to be created. This need is dictated primarily by the high danger of the use of counterfeit products and the use of counterfeit spare parts as well as the current negative situation in terms of the number of such products on the market.

Messe München

The problems and measures to combat the "gray market" will be discussed within the context of this round table.

On Wednesday, May 31, Russian Union of Builders and NAARS are holding a round table on the subject of "Innovative diamond technologies in construction – domestic and foreign experiences in application". Representatives of the Ministry of Construction of Russia, Rosatom State Corporation, Interregional Design Union, Russian Railways and Russian construction companies are invited to participate in the round table.

Johnson Controls invites to participate in a seminar "How to reduce total cost of ownership and construction of truck parks by proper use and maintenance of batteries". On Thursday, June 1, Trimble Solutions Russia together with Tekla Software will hold a seminar "Optimization of construction of buildings and structures from prefabricated reinforced concrete". The seminar will consider in detail the application of information modeling technologies (BIM) in the design, production and assembly stages of precast reinforced concrete structures.

The seminar "Certification of special transport, municipal, construction, road construction machinery and equipment", organized by SAMT-Fund/NGO for the development of certification of special motor transport, means of mechanization and technologies for performing works in construction, will be the next event on Thursday.

The international scientific and practical conference "Modern technologies for design and construction of airports" will complete the CTT supporting program. The conference is organized by the International Association of Foundation Contractors and will bring together experts and specialists from Russian and foreign airports, design and scientific institutes as well as Russian and foreign software companies, specialized construction equipment, machinery and materials companies.

Messe München

Construction machinery trade shows of Messe München

Organizing trade shows for the international construction machinery sector is a core competence of Messe München. Its portfolio includes not only the world's leading trade show, bauma in Munich, and the brand event bauma China in Shanghai—it also cooperates with the Association of Equipment Manufacturers (AEM) in the organization of BAUMA CONEXPO INDIA in Gurgaon/Delhi and BAUMA CONEXPO AFRICA in Johannesburg. In December 2015, Messe München successfully expanded its portfolio again by purchasing the leading Russian construction-machinery exhibition CTT.

Messe München

Messe München is one of the world's leading trade-show companies. It organizes some 50 trade shows for capital and consumer goods and key high-tech industries in Munich and abroad. Each year more than 30,000 exhibitors and some two million visitors take part in events held at the Messe München trade-fair center, the ICM – Internationales Congress Center München and the MOC Veranstaltungscener München. In addition, Messe München organizes trade shows in China, India, Turkey, South Africa, Russia and Brazil. Messe München has a global business presence with affiliates in Europe, Asia, Africa, South America and more than 60 foreign representatives serving more than 100 countries.
